Terms of Acceptance

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working towards the same objective. Chiropractic has only one goal, to detect and correct/reduce the vertebral subluxation complex. It is important to each patient to understand both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

Adjustment: An adjustment is a specific application of forces to facilitate the body's correction of a vertebral subluxation. Our chiropractic method is by specific adjustments of the spine.

Health: A state of optimal physical, mental, and social well-being, not merely the absence of disease or infirmity.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to express maximum health potential.

I hereby request and consent to the performance of chiropractic adjustments and other chiropractic procedures, including various modalities of physical therapies and diagnostic x-rays, on me (or on the patient named below, for whom I am legally responsible) by the doctor of chiropractic named below and or other licensed doctors of chiropractic who now or in the future work at the clinic or office listed below or any other office or clinic.

I do not expect the doctor to be able to anticipate and explain all risks and complications, and I wish to rely upon the doctor to exercise judgment during the course of the procedure which the doctor feels at the time, based upon the facts then known to him/ her, is in my best interest.
